## **DETAILED ACTION**

### ***Status Of Claims***

1. This Office Action is in response to an amendment received 6/3/2010 in which Applicant lists claims 3, 10-11 and 13 as being previously presented, claims 1-2, 4-9 and 12 as being currently amended, and claim 14 as being new. It is interpreted by the examiner that claims 1-14 are pending.

### **EXAMINER'S AMENDMENT**

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Paul Greeley (31,019) on 2/1/2011.

The application has been amended as follows:

- A) Lines 13 through 16 of claim 1 have been replaced with:  
  
--wherein the protection means comprises a plurality of capillary channels which are connected with the suction means for discharging the immersion medium, and which aid the discharge of the immersion medium with at least the aid of capillary forces, the plurality of capillary channels each having an inlet opening that is arranged annularly around the exit lens.--;
- B) Lines 13 through 16 of claim 2 have been replaced with:

--wherein the protection means comprises a capillary channel which is connected with the suction means for discharging the immersion medium, and which aids the discharge of the immersion medium with at least the aid of capillary forces, and wherein the capillary channel is essentially configured as an annular gap around the exit lens.--;

- C) In line 7 of claim 9, "the protection means" has been replaced with --a protection means--;
- D) Lines 6 through 8 of claim 12 have been replaced with:  
--each other such that an essentially annular capillary channel is defined, the capillary channel aiding in removing the immersion medium with at least the aid of capillary forces, and an outlet opening provided in the outer collar portion, via which an opening of the capillary channel is connected with a suction means.--.

### ***Response to Arguments***

3. Applicant's arguments, see pages 6 through 9 of the appeal brief, filed 11/16/2010, with respect to the rejections of claim 9 have been fully considered and are persuasive. Further, the examiner's amendments set forth above put claims 1, 2, 12, and their dependencies in allowable form. Therefore, the rejections of the claims have been withdrawn.

### ***Allowable Subject Matter***

4. Claims 1-14 are allowed.
5. The following is an examiner's statement of reasons for allowance:

Claim 1 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a device for examining chemical or biological samples comprising a protection means surrounding the exit lens for preventing the objective from becoming fouled by the immersion medium, wherein the protection means is connected with a suction means for discharging the immersion medium, wherein the protection means comprises a plurality of capillary channels which are connected with the suction means for discharging the immersion medium, and which aid the discharge of the immersion medium with at least the aid of capillary forces, the plurality of capillary channels each having an inlet opening that is arranged annularly around the exit lens, as generally set forth in claim 1, the device including the totality of the particular limitations recited in claim 1. Claims 3-8 depend from claim 1 and therefore are allowable for at least the same reasons as claim 1.

Claim 2 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a device for examining chemical or biological samples comprising a protection means surrounding the exit lens for preventing the objective from becoming fouled by the immersion medium, wherein the protection means is connected with a suction means for discharging the immersion medium, wherein the protection means comprises a capillary channel which is connected with the suction means for discharging the immersion medium, and which aids the discharge of the immersion medium with at least the aid of capillary forces, and wherein the capillary channel is essentially configured as an annular gap around the exit

Art Unit: 2872

lens, as generally set forth in claim 2, the device including the totality of the particular limitations recited in claim 2.

Claim 9 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest a method for examining chemical or biological samples wherein via a capillary channel defined in a protection means surrounding the objective as an annular gap around the exit lens the immersion medium is discharged automatically, at least with the aid of capillary forces, as generally set forth in claim 9, the device including the totality of the particular limitations recited in claim 9. Claims 10-11 depend from claim 9 and therefore are allowable for at least the same reasons as claim 9.

Claim 12 is allowable over the cited art of record for at least the reason that the cited art of record fails to teach or reasonably suggest an objective cap for protecting an objective from becoming fouled by an immersion medium wherein an essentially annular capillary channel is defined, the capillary channel aiding in removing the immersion medium with at least the aid of capillary forces, and an outlet opening provided in the outer collar portion, via which an opening of the capillary channel is connected with a suction means, as generally set forth in claim 12, the device including the totality of the particular limitations recited in claim 12. Claims 13-14 depend from claim 12 and therefore are allowable for at least the same reasons as claim 12.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2872

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
